About This Game

--- Free Demo ---

Space Dream is a *Music Visualization* experience for Desktop and VR. It is a cosmic adventure that immerses you in a stunning work of art, a celestial world that pulses with life. Abandoning traditional gameplay for a purely aesthetic experience, Space Dream VR interfaces with your music; pulsating to frequencies of sound.

Demo Features

- Visualize the Music playing from any source on your computer
- Play with or without VR
- Explore via Teleportation controls, or fly with Rocket Propelled Hands.
- HTC Vive, Oculus CV1, Keyboard & Gamepad Support!
- Full walkthrough tutorial
- In-game VR Music Browser

--- Space Dream VR - The Full Game ---

- In the full Space Dream experience, you assume the role of Jason, an astronaut that has just awakened from cryo-sleep after arriving on an alien planet in an exploration vessel.
  Your mission is to find and study an artifact; however, during the expedition the unthinkable happens, and you are swept into a world full of sound and beauty.

- Drive your Exploration Vehicle across an Alien Planet, wander through a *Mystical Forest* & Dive to the *Deep Sea* to discover alien artifacts that lead you to new and mysterious worlds!

- Rather than defining itself as a ‘game’ or a ‘music visualizer’, Space Dream VR combines elements from both worlds to produce an entirely new genre of interactive entertainment.
